Integration State

This directory contains connected ideas, architectural documentation, and relationship mappings.

Purpose

- Connect discrete concepts into coherent systems
- Establish relationships between components
- Document architectural frameworks
- Map dependencies and interactions

When to use Integration State

- Architecture diagrams connecting components
- Documentation showing relationships between concepts
- CSS systems that connect visual elements
- Navigation structures linking content areas

Transition Criteria

Content moves from Integration to Application when it:

- Has a complete implementation plan
- Contains sufficient detail for development
- Establishes clear interfaces with other components
- Has addressed major architectural questions
